

# Structure of the KHC Website

This will be the front page of the KHC website.

It is the first page that users see when they visit the site.

It will be composed of text, photos and links using Microsoft Word. The file will be saved as a .pdf document and uploaded to the web site.

The layout of the site will be fixed, but text and photos can be changed, as required for updating.

The links will remain fixed. These will enable the user to jump to other pages on the web site. The file name of each page will be fixed so that a new page simply replaces the old one. This will be controlled using templates in Word created by a graphics designer.

The site will be expandable to any size required.

Example:

Text, text, text, text, etc.

Photo

[Link1](#) (to another page, titles, say, “Our Galleries”)

[Link2](#) (to another page entitled “Or Shop”)

[Link3](#) (to another page “Our archives”)

[Link4](#) (Dummy site example)
